

Day-10 Packet Flow

show ip route.

↳ to see routing table in router

→ We have to do router ^{IP} configuration for both interfaces

interface ethernet
interface e 0/0

ip address 50.0.0.1 255.0.0.0

no shutdown

exit

interface ethernet 0/1

ip address 60.0.0.1 255.0.0.0

no shutdown

exit

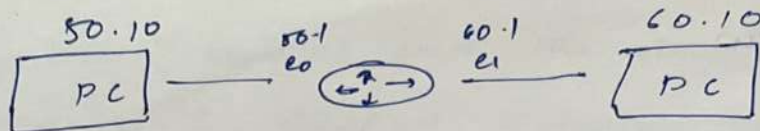

→ Now we have directly connected routes

50.0.0.0/8 - e0/0
60.0.0.0/8 - e0/1

→ After completing this do IP configuration for PC

Use ncpa.cpl → prop → IPv4 → Assign 50.10 & 60.10 in first & second PC.

→ Now from HR PC if we ping 50.1 response will be there & same from Sales PC. But we have to ping Sales from HR, but it won't give response because there is no route in system route table for destination IP in HR PC.

50.0.0.0/8 - 50.10	50.0.0.0/8 - e0/0	60.0.0.0/8 - 60.10
50.0.0.10/32 - 127.1	60.0.0.0/8 - e0/1	60.0.0.10/32 - 127.1
(60.0.0.0/8 - 50.1)		(50.0.0.0/8 - 60.1)

Ping error: Destination host unreachable

We can add route manually to avoid this issue

⇒ [route add 60.0.0.0 subnetmask 255.0.0.0]

When we manually add route gateway is always the next hop device's IP

⇒ Now if we ping, ping error will be Request timed out

Because there is no response from other PC.

⇒ We have to give route to another PC also.

Everytime we cannot manually add routes. There is a shortcut

⇒ We have to go to IP settings & give default gateway

0.0.0.0/0 - 50.1 → this default route will be added

↓
Do not check any matching bits.
